Tom Janson	Summit Co ESC		
Kurt Gwin	Tallmadge City School District		
Matt McGing	Twinsburg City School District		
Phil Luthman	Wadsworth City Schools		
Eric Unangst	Woodridge Local School District		

Items Discussed

Minutes - The April minutes are posted on the NEOnet website.

Election of Officers – The committee approved for Jim Marras (Cuyahoga Falls City School District) to continue as Committee Chairperson and Marc Clendaniel (Green Local Schools) to continue as Vice-Chairperson.

Advisor Committee Dates – The committee approved the following dates for the Technology Advisory Committee meetings:

- September 6, 2018
- October 4, 2018
- November 1, 2018
- December 6, 2018
- January 10, 2019 (2nd Thursday)
- February 7, 2019
- March 14, 2019 (2nd Thursday)
- April 11, 2019 (2nd Thursday)
- May 2, 2019

Summer Summit – There was an idea to plan a summer summit this year, possibly the 1st or 2nd Thursday in August to go over updates, modifications, etc. However, the summer months are tough for the group to be away from their districts. We will revisit in September at the next Tech Advisory meeting.

- a) Data Privacy – Ongoing discussion regarding data privacy.
- b) Future Ready Schools
- c) Social Media Archiving – Matt McGing to present regarding social media archiving. Also, for more information, see email from Jim Marras.

Securly Migration

- a) Fee Increase – There is an increase from \$1.00 to \$1.60 per student.
- b) Lightspeed EOL Date – The Lightspeed EOL date is July 31, 2018. Districts can begin migrating to Securly now. Securly will provide the majority of the support, however, NEOnet can assist with scheduling and/or coordinating, if necessary. Ben is the project lead for migrating districts to Securly. He can be contacted at technicalhelp@neonet.org or 330-926-3900 ext. 601122. Also, it is highly recommended that school districts migrate a few devices prior to the end of the school year. To begin the process, email Chris Zolla at zolla@neonet.org. He will email a form that needs to be completed to have a call scheduled with Securly. There will be more information to come.

Social Media Archiving

- a) Page Freezer Demo – Matt McGing – Matt did a brief demo of Page Freezer and a power point presentation. One of the main reasons that Matt chose to go with Page Freezer is because they offer static pricing unlike other vendors. The presentation will be added to the share folder as reference.

NEOnet Network

- a) Google Classroom – Some concern with permission requirements when users are in training. Users aren't able to participate fully during the training session. Districts would have to white list individual domain/drive.
- b) Video
 - WebEx – Currently, we have licenses available. The cost is \$60 per account.
 - Video Cart – The video cart is mobile and offers a new more flexible way of learning. Districts can offer and participate in distance learning classes with other districts. Currently, working on pricing for the video cart to be set up, delivered and configured.
- c) Two Factor Authentication – NEOnet is beginning two factor authentication with staff on a limited basis before rolling out to all employees. We are authenticating everything we can, however, doesn't work with eFP, DASL, or ProgressBook.
- d) District Incident Response – A district incident response plan has been shared in the Technology Coordinator team drive in Google. This is available for all districts to use.
- e) Firewall and Security Solutions – Ongoing discussion. Currently reviewing all options and will present to the Finance Committee. We have been vetting multiple vendors to find the most cost effective and robust solution for our consortium.
- f) DDoS Cloud Mitigation – NEOnet is debating whether or not we need to renew cloud mitigation. Some of the same services are offer by our primary ISP, OARnet. The physical appliances will stay in place for at least another year.

Technology Integration Discussion

The last meeting for the school year is scheduled for May 8th at 9:00 a.m. The meeting would be good for members and nonmembers to attend to learn more about the Tech Integration Service package. More strategic plan and goals for the new year. Google training camps are scheduled for June 11th – 14th and 26th – 29th. Grad credit will be available.

This will be our last Technology Advisory Committee Meeting for the 2017 -2018 school year. We look forward to seeing everyone in September!
