COMMON CORE
State Standard
40 plus states are connected across the country to the Common Core in English Language Arts and Math
Science and Social Studies are not part of the Common Core. They are Ohio Based.
The Old standards are repacked into fewer and deeper learning objectives.
Now the ELA is married to Social Studies. 70% of the reading material is now nonfiction.
Math is tied to Science
OLD VOCABULARY

- Standards
- Benchmark (student expectations)
- Grade level indicators

- Moved from broad to specific.
NEW VOCABULARY

- Standard – what students need to understand or do
- Cluster – groups of related standards
- Domain – larger groups of related standards

- Moving from specific to broad.
VOCABULARY FOR MATH

- Strand
- Topic
- Standard
ENGLISH LANGUAGE ARTS

• Packaged to bring the importance of speaking and listening skills.
• Literacy standards are in all subjects.
WHAT ROLE DO WE PLAY IN STUDENT GROWTH

• LMC has an important role.
• We are resource to teachers & students.
• If our teachers are standards based, our libraries must be standards based.
• To demonstrate our value we must know the material

The Standards

Building on the excellent foundation of standards states have laid, the Common Core State Standards are the first step in providing our young people with a high-quality education. It should be clear to every student, parent, and teacher what the standards of success are in every school.

Teachers, parents and community leaders have all weighed in to help create the Common Core State Standards. The standards clearly communicate what is expected of students at each grade level. This will allow our teachers to be better equipped to know exactly what they need to help students learn and re-establish individualized benchmarks for them. The Common Core State Standards focus on core
English Language Arts Standards

The Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects (“the Standards”) are the culmination of an extended, broad-based effort to fulfill the charge issued by the states to create the next generation of K–12 standards in order to help ensure that all students are college and career ready in literacy no later than the end of high school.

The present work, led by the Council of Chief State School Officers (CCSSO) and the National Governors Association (NGA), builds on the foundation laid by states in their decades-long work on crafting high-quality education standards. The Standards also draw on the most important international models as well as research and input from numerous sources, including state departments of education, scholars, assessment developers, professional organizations, educators from kindergarten through college, and parents, students, and other members of the public. In their design and content, refined through successive drafts and numerous rounds of feedback, the Standards represent a synthesis of the best elements of standards-related work to date and an important advance over that previous work.

As specified by CCSSO and NGA, the Standards are (1) research and evidence based, (2) aligned with college and work expectations, (3) rigorous, and (4) internationally benchmarked. A particular standard was included in the document only when the best available evidence indicated that its mastery was essential for college and career readiness in a twenty-first-century, globally competitive society. The Standards are intended to be a living work: as new and better evidence emerges, the Standards will be revised accordingly.

The Standards are an extension of a prior initiative led by CCSSO and NGA to develop College- and Career-Ready Standards for all students for the next generation of standards.
